WHEN YOU SERVE MEAT, YOU'RE SERVING UP REAL NUTRITION!

PROTEIN RICH

Lean cuts of beef, chicken or pork deliver high doses of protein, needed to maintain and repair body tissue, while improving the function of your weight-regulating hormones.

FOR BETTER BONE HEALTH

Higher protein intake helps you maintain bone mass as you age, which results in a lowered risk of osteoporosis and bone fractures.

A GREAT SOURCE OF VITAMINS

Meat is a great source of the B vitamins... especially B12 which helps develop red blood cells, and keep the nerves and brain functioning normally. Plant-based diets can't provide enough!
